how can you help me

I can help you understand the configuration and administration of a hackathon, as outlined in the provided document. Here's a summary of the key steps:

1. **Configure Proposal Submission Questions:** Define the proposal submission form by using the platform's default questions or adding custom questions based on your hackathon requirements. You can make some fields required and choose from various question types.
2. **Configure Solution Submission Questions:** Define the solution submission form by using the platform's default questions or creating custom questions to collect the required solution details. Include fields for solution descriptions, source code repositories, demo links, presentations, videos, supporting documents, and other deliverables.
3. **Configure Evaluation Criteria:** Define the evaluation criteria that judges and evaluators will use to assess proposals and solutions. Create multiple scoring

criteria and assign an appropriate weightage to each criterion for a fair and consistent evaluation process.

4. **Configure Terms & Conditions:** Define the Terms & Conditions that participants must accept before joining the hackathon. You can also configure separate Terms & Conditions for judges and evaluators.
5. **Configure Email Templates:** Review and customize the automated email templates that will be sent throughout the hackathon lifecycle. Ensure the email content is appropriate for participants, evaluators, judges, and administrators for various events.
6. **Submit for Approval:** After reviewing the complete hackathon configuration, ensure all mandatory fields have been completed and validated. Click Submit for Approval to send the hackathon to the Super Admin for review. Once approved, the hackathon can be published and made available to participants.
7. **Hackathon Stages:** In the Stages tab, you can set up the stages for your hackathon, including Ideation, Development, and Submission. You can also customize the duration for each stage.

The given document also mentions the process for judging, prizes, and other details, but those steps seem to be outside the scope of the customer query you provided.

draft an email for the above

Subject: MSU Hackathon - Hackathon Configuration Approval Request

Dear [Customer's Name],

I hope this email finds you well. I am writing to follow up on the MSU Hackathon configuration you have recently submitted for review.

Your hackathon configuration has been carefully reviewed, and we are pleased to inform you that it has been approved! The MSU Hackathon is now ready to be published and made available to participants.

You can now proceed to the following steps to finalize the setup:

1. **Configure Hackathon Stages:** In the Stages tab, you can set up the stages for your hackathon, including Ideation, Development, and Submission. You can also customize the duration for each stage.
2. **Promote your Hackathon:** Share the hackathon details with your team, participants, and the larger community to encourage more participation.
3. **Prepare for the Hackathon:** Ensure that you have all necessary resources and support ready for the participants throughout the event.
4. **Engage with Participants:** Encourage active participation, foster creativity, and help guide participants as needed to ensure a successful hackathon.

We appreciate your efforts in setting up the MSU Hackathon and are excited to see the innovative solutions that will emerge from it. If you have any questions or need further assistance, please do not hesitate to reach out.

Best regards,

[Your Name] [MSU Corp Support Agent]

rephrase the above email and make it short

Subject: MSU Hackathon Approved

Hello [Customer's Name],

Great news! Your MSU Hackathon has been approved and is ready for publication. Here are the next steps:

1. Set up stages: Configure the Ideation, Development, and Submission stages.
2. Promote: Share the details and encourage participation.
3. Prepare: Ensure resources and support are ready for participants.
4. Engage: Foster creativity and guide participants throughout the event.

If you need assistance, feel free to reach out.

Best regards, [MSU Corp Support Agent]

can you make it even more simple

Sure, here's a simplified version of the instructions:

1. Upload Supporting Documents: You can upload documents that may help the judges understand your proposal better.
2. Scoring Criteria: Score each criterion based on the guidelines provided. You can save your progress and return later if needed.
3. Save Progress (Optional): If you need to take a break, click on 'Save and Continue Later'. Your scores will be saved and the proposal will be marked as 'In-Draft'.

4. Proceed to Next Screen: Once all criteria have been scored, click on 'Next' to move to the next step of the evaluation.
5. Review and Edit Scores: After all criteria have been scored, you can review your scores and comments, download them, or edit them if necessary.
6. Submit Scores: Finally, submit your scores when you're satisfied with them. This will complete the evaluation process.

how can i register my team for hackhton

To register your team for the hackathon, follow these steps:

1. Go to the hackathon's registration page. This might be available directly on the hackathon's website or through a link provided in the event's information.
2. Click on the "Register CTA" (Call To Action) button. This will initiate the registration process.
3. After successful registration, you will be registered for the hackathon.

If the proposal submission stage is open, you can submit your team's proposal. Here's how:

1. If the registration and proposal submission stages are running in parallel, the "Submit Proposal" CTA (Call To Action) will appear instead of "Register CTA".
2. You can access the "Submit Proposal" CTA from the "My Hackathons" table in the "Hackathon Participation" screen. To do this:
 - a) Click on "Hackathon Participation" under "Hackathon & Innovation Challenge" in the blue

navigation bar.

b) On the displayed screen, click on the hackathon for which the proposal is to be submitted.

c) You will be displayed with the hackathon steps.

d) In the "My Hackathons" table, the "Submit Proposal" CTA is available in the "Status – Next Step" column. Click on it to start drafting the proposal.

Or, you can also access the "Submit Proposal" CTA from the "Hackathon steps":

1. Click on the hackathon name in the "My hackathons" table and scroll down to the hackathon steps.
2. Click on "Eligible to Respond" in the "Submit your proposals" block.
3. Clicking on "Eligible to Respond", you will be taken to the problem statements section on the hackathon landing page.

This should guide you through the process of registering your team for the hackathon and submitting your proposal. Good luck with your team!

make an email for the above

Here's an example of an email that the support agent could send to the customer to guide them through the process of registering their team for the hackathon:

Subject: Registration for [Hackathon Name]

Dear [Customer's Name],

Thank you for reaching out to MSU Corp for assistance with registering your team for the [Hackathon Name].

To register your team, please follow the steps below:

1. Go to the hackathon's registration page at [Registration URL].
2. Click on the "Register CTA" button to initiate the registration process.

If the proposal submission stage is open, you can also submit your team's proposal. Here's how:

1. In the "My Hackathons" table, you will find the "Submit Proposal" CTA in the "Status – Next Step" column. Click on it to start drafting the proposal.

We hope this helps you in registering your team for the [Hackathon Name]. If you have any questions or encounter any issues, please don't hesitate to contact us.

Wishing you success at the hackathon!

Best regards,

**[Your Name] MSU Corp

make it more detailed orineted

Title: Detailed Guide on Hackathon - Evaluator Proposal Evaluation Process

1. Accessing the Scoring Interface:

- To begin the evaluation process, navigate to the Hackathon - Evaluator Proposal Evaluation page.
- Once you are on the page, you will find a list of proposals assigned to you.

2. Downloading Scores:

- Click Download to save a copy of the scores you have entered for future reference.

3. Editing Scores:

- If you need to make changes to the scores, click on Edit Scores. This action will redirect you to the scoring screen where you can update the scores or comments.

4. Submitting Scores:

- Once you are satisfied with your entries, click Submit to finalize the scores for the proposal.

Post-Submission:

- After submitting the scores, you will be navigated back to the Proposals List screen.
- If you need to make changes to the scores, then click on Edit.
- Continue to evaluate and provide scores for all the proposals assigned to you, except for those marked with a conflict of interest.

3.4 Edit Scores:

- After submitting the scores, the CTA (Call to Action) next to the proposal |

Describe your issue or ask a question...
